

Covad Partners with AT&T to Offer Bundled DSL and Voice Services in 11 New States

Aggressive Nationwide Rollout of Voice and Broadband Bundle Continues To Build Momentum

San Jose, CA, (April 6, 2004)—Covad Communications Group, Inc. (OTCBB: COVD), a leading national broadband service provider of high-speed Internet and network access, announced today the introduction of Covad's digital subscriber line (DSL) broadband service in AT&T's communication bundle for residential users in Alabama, Arizona, Delaware, Florida, Georgia, Louisiana, Minnesota, New Hampshire, North Carolina, Rhode Island and Tennessee.

Covad's DSL service is bundled with AT&T local and long-distance services, offering consumers the advantage of a single, convenient telecommunications package. Launched in early 2003, AT&T now offers Covad's DSL service in a total of 25 states.

"Working with AT&T, Covad continues to provide its critical broadband ingredients and plays a pivotal role in offering consumers an affordable choice in telecommunications," said Charles Hoffman, president and chief executive officer of Covad. "The successful combination of Covad's broadband and AT&T's voice services illustrates our commitment to drive nationwide broadband adoption."

The ability to bundle AT&T local and long distance services with Covad's DSL service is based on a process called line splitting. AT&T "splits" the loop it buys from local phone companies to offer AT&T local and long distance with Covad's DSL service on the same line.

Covad's nationwide network is the only national DSL footprint. Covad's network enables ISPs and CLECs alike to partner with Covad for their broadband needs. A growing number of companies nationwide including AT&T, AOL, EarthLink, Sprint, Speakeasy, MCI, MegaPath and XO work with Covad to power their consumer and business broadband offerings.

Consumers interested in signing up for AT&T DSL Service can call 1-800-WORLDNET, or visit www.att.net/dsl.

About Covad
