- **Expert support**—Live technical support 24x7x365

**Malware:** (n.) Malicious software designed to infiltrate, attack, or damage a computer, server, or network.

## McAfee Total Protection for Small Business—from Covad

New threats emerge every day. Without constant updates, your security software becomes obsolete, allowing viruses, hackers, and spyware to steal your valuable data and disrupt your network. You need a hosted and managed security service that provides automatic, continuous protection against all types of known and unknown threats.

**SERVER AND DESKTOP PROTECTION.** Covad has partnered with McAfee® to provide you with best-of-breed hosted security protection: *McAfee Total Protection™ for Small Business* software. Defend your business against viruses, spyware, phishing, and identity theft with a single, hosted software solution. It's simple to install and easy to use.

**COVAD MAKES IT EASY.** Choose Covad to help protect and secure your network while providing reliable business-class Internet access. With one experienced provider, one bill, and live 24x7x365 expert support, you can focus on growing your business instead of defending it.

**AUTOMATIC. ALWAYS ON.** Your network protection is only as good as your last update. To proactively protect against threats, the service automatically updates your systems at frequent intervals, continuously checking for problems and providing the latest security updates. McAfee also uses Rumor Technology to minimize distribution time to your local area network and has an outbreak response feature to protect your systems immediately during virus outbreaks.

**COMPREHENSIVE COVERAGE.** Covad anti-malware service transparently scans and cleans desktops and file servers for viruses and malicious software, helping to identify and eliminate them before they can infiltrate and compromise your systems. Covad makes it easy to simplify your security with proven McAfee technology.

**AFFORDABLE PROTECTION. FLEXIBILITY TO GROW.** Obtain all the cost-effective protection you need for a single monthly fee. Purchase only what you need today; easily add more licenses as you add new desktops and servers.

**EASY TO INSTALL. EASY TO MAINTAIN.** A customized installation link will be sent to you for quick deployment to all your users. Once you have downloaded and installed the McAfee agent, your workstation or file server is automatically protected. Access the online McAfee SecurityCenter to view the status of all your computers and verify their security levels, manage security policies, and check reports on suspicious network activity.

#### FEATURES AND BENEFITS

FEATURE	BENEFIT
Anti-virus and anti-spyware	Proactively protects your desktops and file servers from viruses and spyware by guarding against known threats and potentially unwanted programs that can corrupt or slow down your systems.
Desktop firewall	Creates an immediate barrier between your critical data and malicious intrusions. Blocks unwanted Internet access to and from your computers and keeps hackers and identity thieves out.
Centralized management console	Provides a single view of all your systems and locations with Web-based access to the McAfee SecurityCenter for remote configuration, reporting, and management.
Real-time browser protection	Warns users before they visit a dangerous website and helps avoid online threats like downloaded viruses and phishing attacks in real time.
Continuous, automatic updates	Defends all your systems, all the time, with advanced protection that's never obsolete. Regular, automated Internet updates help keep your systems safer.

**SYSTEM REQUIREMENTS.** The service is designed for Microsoft Windows operating systems running on a PC platform. It installs and runs on servers and client computers equipped with:

- **Processor**—Intel Pentium or compatible architecture
- **Browser**—Microsoft Internet Explorer 5.5 SP2 or later
- **RAM**—64 MB minimum; 256 MB recommended (required to run firewall service under Windows XP). 512 MB recommended for servers. 1 GB recommended for Windows Vista.

**RELIABILITY AND EXPERT SUPPORT.** We know the security and reliability of your network is an essential element of your business operations. That's why we back our anti-malware service with live 24x7x365 customer support.

**COUNT ON COVAD.** Covad has been delivering business-class broadband service to small and medium-sized businesses for more than 10 years. Covad offers high-speed Internet connectivity, voice services, security services, and Web and email hosting services, all over its fully managed nationwide network.
